EXPERIENCE

Frontend Developer Intern | Musterbox

April 2025 - November 2025

- Designed and built P2P crypto payment gateway frontend with dual merchant/buyer interfaces and dynamic flows for seller selection, bank transfers, and crypto transactions.
- Implemented IndexedDB caching architecture reducing server load by 40% while enabling offline access to user profiles, tournaments, feeds, and wallet data.
- Integrated Reown AppKit for Web3 wallet connectivity supporting Solana wallets (Phantom, Solflare) for tournament participation and crypto rewards
- Architected state management using React Query, Zustand, and Context API across both P2P gateway and gaming platform, implementing optimistic UI updates and efficient data fetching patterns.
- Collaborated with senior full-stack engineers on API integration, authentication flows, and responsive design across Developer Space (game upload portal), gaming platform.

Frontend Developer Intern | Harvoxx Tech Hub

April 2022 - November 2023

- Developed responsive web application features for Homigon (real estate platform) using JavaScript, HTML, and CSS while collaborating with UI/UX designers and backend developers
- Integrated RESTful APIs and maintained code quality through version control (Git), peer code reviews, and development best practices

PROJECTS

NOA CBT Practice Platform | [Live](#) | [GitHub](#)

React, TypeScript, Supabase, Tailwind CSS

- Built CBT simulation platform for National Orientation Agency staff featuring timed exams, Fisher-Yates question randomization, and auto-save functionality.
- Achieved Lighthouse scores of 98 (Performance), 92 (SEO), 92 (Accessibility), 100 (Best Practices) through code-splitting, lazy loading, and optimized state management.

CyberTech | [Live](#) | [GitHub](#)

Next.js, TypeScript, Tailwind CSS

- Developed a high-performance e-commerce platform with dynamic filtering, persistent cart management, and a streamlined checkout flow. Optimized the frontend for speed and accessibility to ensure a seamless, responsive user experience.

Whispers - Anonymous Blog | [Live](#) | [GitHub](#)

Next.js, TypeScript, Node.js, Express, Supabase, PWA

- Developed full-stack anonymous blogging platform with custom Express backend, session-based authentication, rate limiting middleware, and Supabase row-level security to ensure zero personal data collection

SKILLS

Languages: JavaScript, TypeScript, HTML, CSS

Frameworks & Libraries: React, Next.js, React Query, Zustand, Tailwind CSS, Shadcn UI, Recharts

Tools & Platforms: Supabase, Firebase, Git/GitHub, IndexedDB, RESTful APIs, OpenAI API, WebSocket

Soft Skills: Problem Solving, Collaboration, Communication, Time Management

EDUCATION

Rivers State University Port Harcourt

2019-2024

Bachelor of Technology (B.Tech) - Mechanical Engineering
